BAIM / GENERATED REFERENCE

# Chapter 1 Animation Library

One generated entry point for character animation, world motion, and future-ready static assets. Empty animation slots remain visible so production gaps do not disappear.

**17**
Bai Mitko sources

**12**
supporting characters

**23**
world-motion entries

CATALOG

## Bai Mitko

**17**

**enabled source animations**

Detailed main-character movement, idles, dialogue, reactions, and actions.

CATALOG

## Chapter 1 NPCs

**12**

**tracked characters**

Current static poses and future animation slots for supporting characters.

CATALOG

# World Motion

## 23

**9 live motion entries**

Procedural effects, UI keyframes, timed layers, and static state transitions.

## Workflow

Add or register an animation in the runtime sources, then run **npm run build:animation-catalogs**. New discoveries appear automatically; unknown entries are flagged for review. CI runs the matching freshness check.
